Q14. Design a web page to move the background image with content of the page & set the one image in top right & image on the top left position.

```
Code : <!DOCTYPE html>
<html>
<head>
<style>
#ex {
background-image : url (" (:1. gif)");
background-size : 150 px;
background-attachment : fixed;
}

div { height : 200 px;
width : 400 px;
font-size : 30 px;
position : relative;
top : 200 px;
}

#tright { height : 120 px;
width : 200 px;
position : relative;
top : -300 px;
right : -1060 px;
}

#tleft { position : relative;
top : -210 px;
}
```

</style>

</head>

<body id = "ex" >

<div>

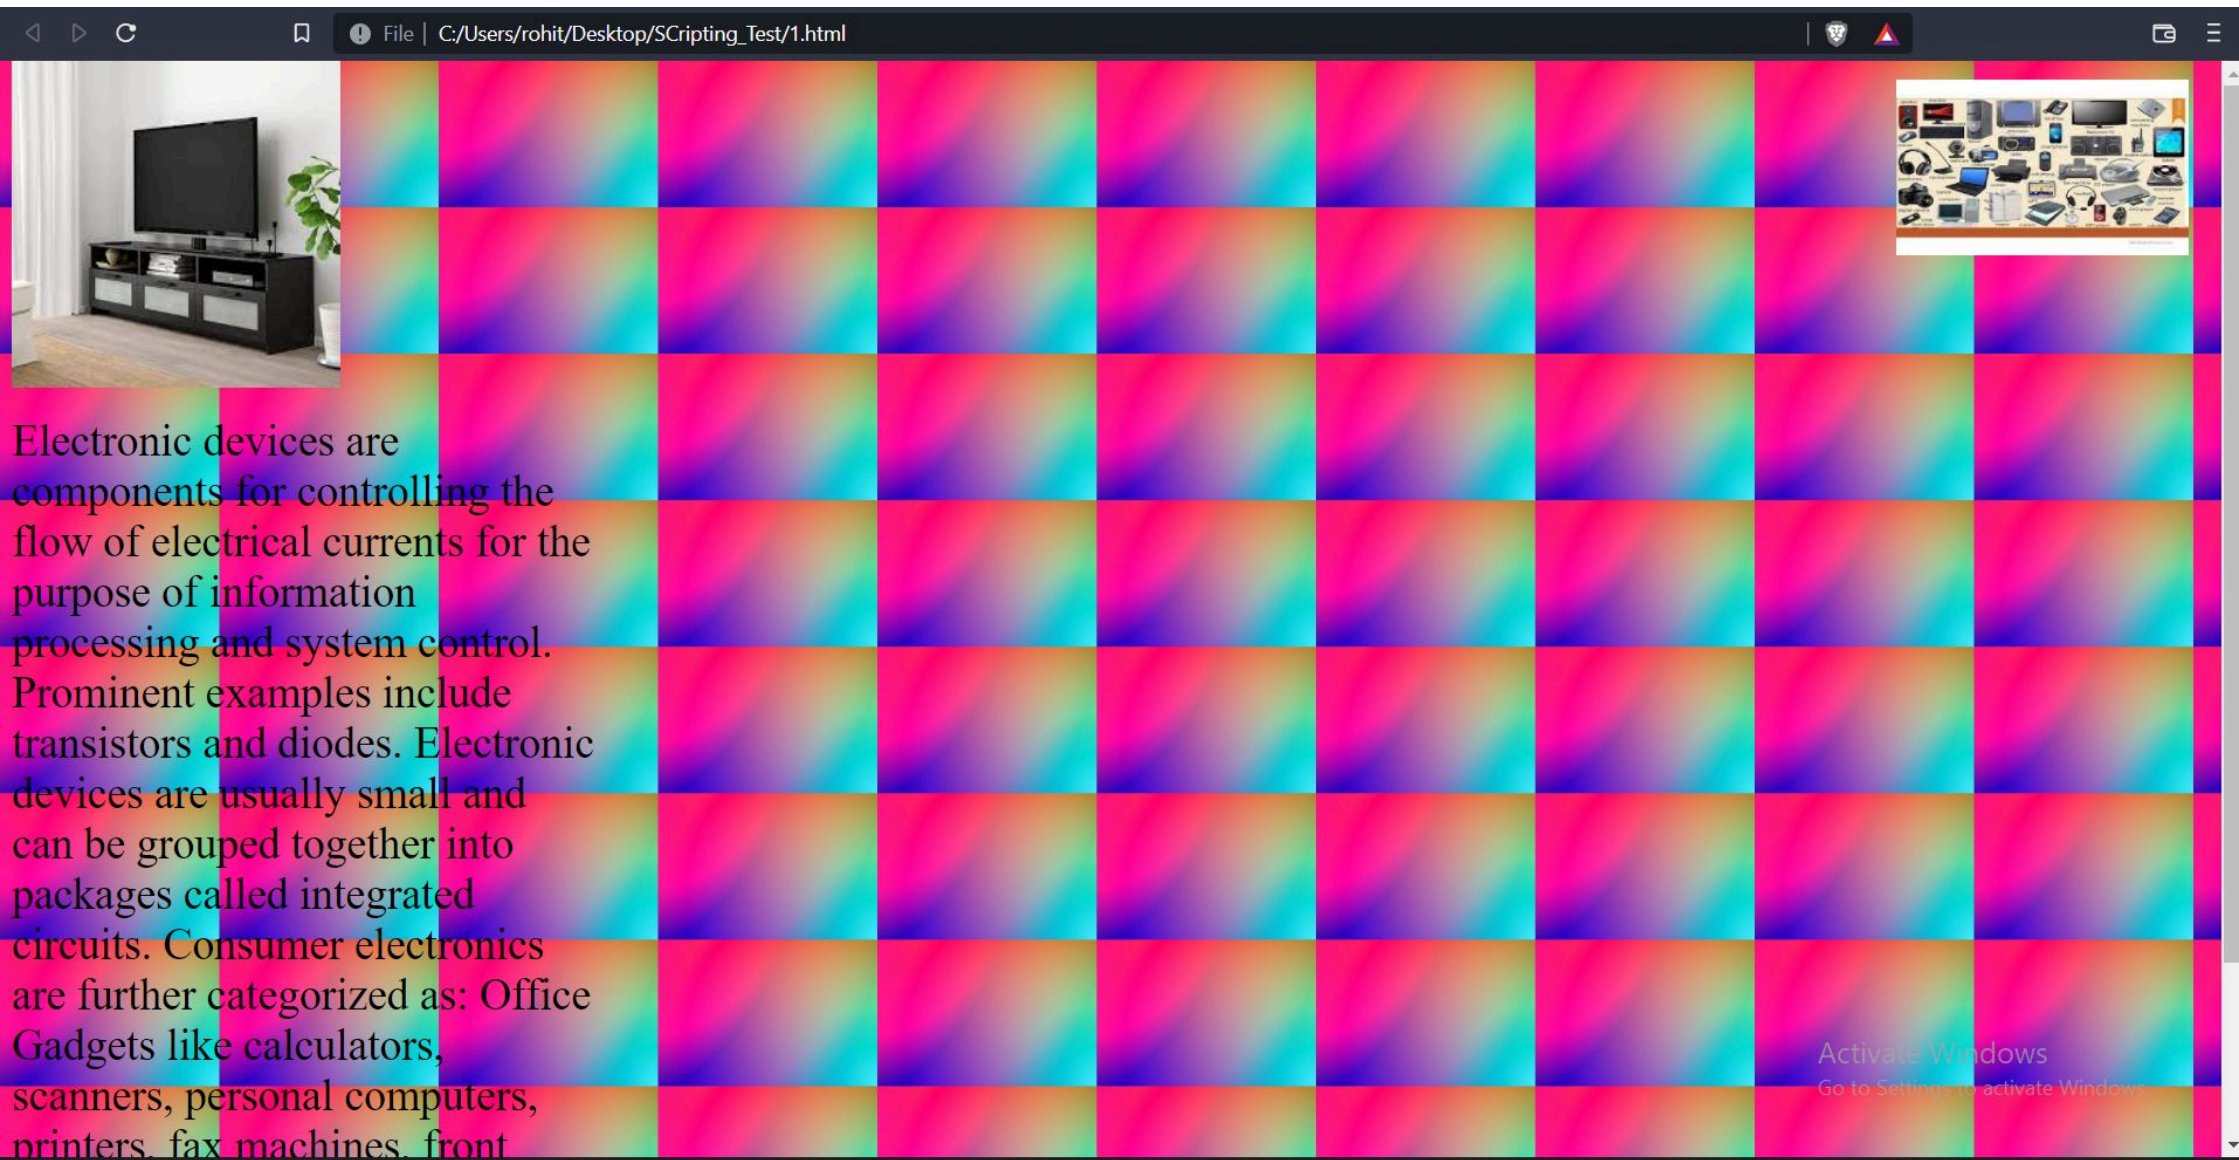

Electronic devices are components for controlling the flow of electrical currents for the purpose of information processing & system control. Prominent examples includes transistors & diodes. Electronic devices are usually small & can be grouped together into packages called integrated circuits.

Consumer electronics are further categorized as: office gadgets like calculators, scanners, personal computers, printers, fax machines, front projectors, etc. Home appliances such as refrigerators, a/c, washing machine, vacuum cleaner, microwave oven, etc.

</div>

</body>

Q24. Create an HTML page named as "navigatorframe.html". Divide the page into two columns of 40%, 60% size. In 40% size call the hyperlink file "link.html", & make the page to be get displayed on the other column when the link is clicked.

Code:

Navigatorframe.html

```
<!DOCTYPE html>
```

```
<html>
```

```
<frameset cols = 40%, 60% >
```

```
<frame src = "link.html" name = "left" >
```

```
</frameset>
```

```
</html>
```

⚡ Demo.html

```
<html>
```

```
<body>
```

```
<label for = "text 1" > username </label>
```

```
<input type = "text" name = "t1" id = "text 1"
```

```
placeholder = "enter your userid" required ><br><br>
```

```
<label for = "pass" > password </label>
```

```
<input type = "password" name = "p1" id = "pass"
```

```
placeholder = "enter your password" required ><br><br>
```

```
<input type = "submit" >
```

```
</body>
```

```
</html>
```

Link: Html

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<p> This is Link. html <br>
```

```
<a href = "demo.html" target = "right" > Display on Right </a>
```

```
</p>
```

```
</body>
```

```
</html>
```

THIS IS LINK.HTML
[Display On Right](#)
